Sarvinoz Mamirjonova

Andijan Uzbekistan | msarvnoz1@gmail.com | +9989306107777

I am 16 y.o and I am a Backend Web developer and I mainly work on Phyton. In addition, I also know html5, css3 and how to work with bootstrap.

EDUCATION

I study at school at 24th school on 9th grade *Andijan Uzbekistan .*

I have completed a one year course in digital city in Andijan(2022-2023)

While studying there, I have gained experience on the following:

Python, Solving problems with the help of python, Django, Django Rest Framework, Telegram bot, Postgresql, Jwt token, API(decorator, modelviewset, generics), Github, Server deploy, Nginx, Uwsgi, Documentation, Drf-yasg(swagger), Slug, Sending email by Django, Bootstrap, Html, Css.

WORK EXPERIENCE

Web Backend programmer

My real projects are the following:

Digital girls

Landing page and admin panel for digital city in Andijan(Digital girls 2)

In this landing page, information about the program can be gained and girls who have interest on IT spheres can register and learn IT in DC for free. All needed information for admin is provided in admin panel, where the administration can see the applications and edit landing page information.

TRELLO FOR DC(crm)

This project is like trello. I have created this project for the staff members in digital city where the tasks can be created, edited, deleted, finished and linked to employees.

In this project, every change is sent to the members by email.

SOOSUM

A landing page for a product company, where web users can get data about that company. I also created an admin panel for the main admin.

You can see my other projects on **my github page**: https://github.com/msarvinoz/

Additional:

I know English very well, so there is no problem on working in this language + I also know Russian too.

I can **work with team** easily, some of my project are created individually and with team.
